

Jungle

The word 'jungle' comes from a Sanskrit word meaning 'uncultivated land'. A **jungle** is land covered with dense vegetation dominated by trees

Plants and trees

The plants of the jungle are very beautiful. For example :

- Jungle rose
- Plant calliandra
- Jungle geranium

The trees are :

- Capirona
- Kapok tree
- Brazil nut tree

Animals

There are a lots of animals in the jungle, some ones are :

Jaguar

Toucans

White piranha

Ocelot

Macaws

Longwing butterflies

Small turtles

Cane toad

Climate of the jungle

They may also contain areas of swamp and mountain areas that can reach over 3000 metres above sea. These high altitude jungles are still wet but can also have more temperature. At night the temperature is very cold
